Committed to helping you grow your practice.

Mission
At Fine Arts, we know that effective and timely communication is key to achieving superior results and building trust.

We continue to work closely with and learn from members of PAC Live, LVI and the AACD.

Our technicians are trained to understand and align esthetic standards of quality and style with our dentists to ensure satisfaction for their patients.

We are strongly committed to case planning by providing fully functional diagnostic wax-ups, prep guides, provisional matrixes and digital in-progress photographs to ensure successful completion of the case.

We provide educational and technical support to dentists to ensure accurate communication about new technologies and materials, smile design and principles of occlusion.

Results

Latest Technology

Fine Arts Dental Labs has been instrumental in helping many dentists develop their practices.

Our quality of work is consistently high. Technical staff are accessible, easy to talk to, and are very experienced and knowledgeable about the latest technical products and systems.

Our pick-up and delivery service is prompt, friendly, on time and at no charge.

Working with Fine Arts will help you meet your goals of delivering exceptional service to your patients.

“Practices should think of the dental lab as part of its extended team”.

Dental Practice Management, Summer 2006

“Part of working with a good lab is developing harmony between the doctor, patient and technician.”

You must choose wisely. The success of your restoration is a team effort with a quality laboratory.

Aesthetic Dentistry, Fall 2006
